

AGENCY FOR HEALTHCARE RESEARCH AND QUALITY

MEPS-HC Medical Conditions Data

Rebecca Ahrnsbrak

MEPS-HC CAPI Medical Condition Data Collection

Priority conditions

- **Fifteen specific condition questions**

Open-ended reporting

- **Medical events**
- **Condition enumeration (prior to 2018)**
- **Disability days (prior to 2013)**

Priority Conditions

Ever told by health professional (18+ except where noted)

- Hypertension/high blood pressure (HIBPDX, BPMLDX)
- Coronary heart disease (CHDDX)
- Angina (ANGIDX)
- Heart attack/myocardial infarction (MIDX)
- Other heart disease (OHRTDX)
- Stroke/transient ischemic attack (STRKDX)
- Emphysema (EMPHDX)
- High cholesterol (CHOLDX)
- Cancer/malignancy (CANCERDX)
- Diabetes (DIABDX_M18)—All ages
- Arthritis (ARTHDX)
- Asthma (ASTHDX)—All ages
- Attention deficit hyperactivity disorder (ADHDADDX)—ages 5–17

Priority Conditions (cont.)

During past 12 months, have you had

- **Chronic bronchitis**
 - CHBRON31
- **Joint pain/aching/stiffness/swelling**
 - JTPAIN31_M18

Open-Ended Reporting of Conditions

Medical Events

- Main source of condition data (100% 2018 onward)

Condition Enumeration

- 1996–2017 (discontinued in Panel 21 Round 5 and Panel 22 Round 3)

Disability Days

- 1996–2012 (discontinued in 2013)

Medical Event Condition Questions

Question: What conditions were discovered or led (PERSON) to make this visit?

- Hospital inpatient
- Hospital outpatient
- Emergency room
- Office-based medical providers
- Home health

Question: What health problem is (MEDICINE) prescribed for?

- Prescribed medicine purchases

Condition Coding and Editing

Verbatim text recorded and coded to fully specified ICD codes

- Public use files contain 3-digit codes
- ICD-9: 1996–2015
 - Also collapsed to clinical classification codes—Clinical Classification Software (CCS) (aggregation of ICD-9 codes into broad, clinically meaningful categories)
- ICD-10: 2016 onward
 - Also collapsed to Clinical Classification Software Refined (CCSR) codes on the 2018 and later conditions files
 - 2016 and 2017 public use conditions files have only ICD-10 codes currently (no CCSRs) but adding CCSRs soon

Beginning in 2020: Condition look-up tool in CAPI

Showing Trends with ICD-10 Transition

Source: Agency for Healthcare Research and Quality, Center for Delivery, Organization, and Markets, Healthcare Cost and Utilization Project, State Inpatient Databases for 2015 and quarterly inpatient data for 2016 from three States (Colorado, Kentucky, and Minnesota).

Condition Files

Condition Link Files

Medical Conditions and Conditions Link Files (cont.)

Conditions File

- Observations of unique person/condition pairs
- ICD-9 (1996–2015) and ICD-10 (2016–present)
- CCS codes (1996–2015) and CCSR codes (starting in 2018)
- Priority conditions NOT included unless the condition is also reported as current (for 2018 onward the condition must be associated with an event)
- Variables that indicate the number and type of event a condition links to (e.g., ERNUM – number of ER events associated with a condition)

Conditions Link File

- Condition ID (CONDIX) and event ID (EVNTIDX) for linking conditions with events
- Event type (EVNTYPE)

Medical Conditions Data: Caveats and Limitations

Potential Underreporting

- Respondent not aware or asked
- One respondent per household
- Sensitive conditions underreported in surveys
- Condition not salient or bothersome
- No medical care received

Some Recorded Text Strings Not Easily
Classified into ICD Condition Codes

Caveats and National Estimates of Condition Prevalence

MEPS cannot be used to produce overall disease prevalence estimates.

- **See caveats on previous slide.**

MEPS can be used to produce “treated prevalence.”

- **From 2018 onward, current conditions (those on the conditions files) are only those linked to events in the relevant year.**
