Major Changes Made in 2018

- **Design changes may impact trend analyses.**
- **Changes made to increase the reporting of coverage include:**
 - 1. Verification module was added.**

Those not reporting any hospital/physician coverage were asked (1) whether they had coverage, and, if so, (2) type of coverage.

Major Changes Made in 2018

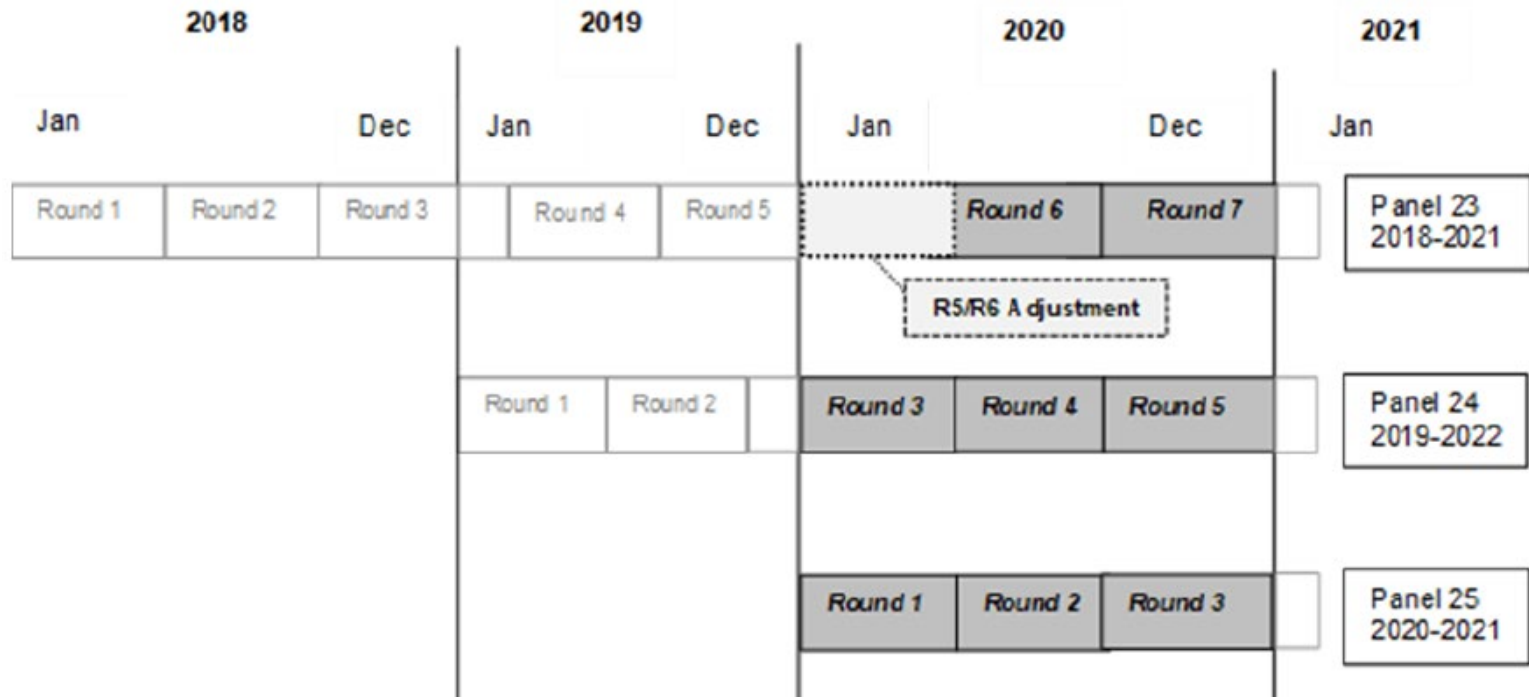

2. Previously questions about the following types of coverage were asked at the RU level

(e.g., “Has anyone in the family been covered by . . .?” “Who has been covered by . . .?”).

- Medicaid/SCHIP, military coverage, or Medicare (\geq 65 years old) when first asked
- Medicaid/SCHIP, military coverage, other public, or private coverage when reviewed

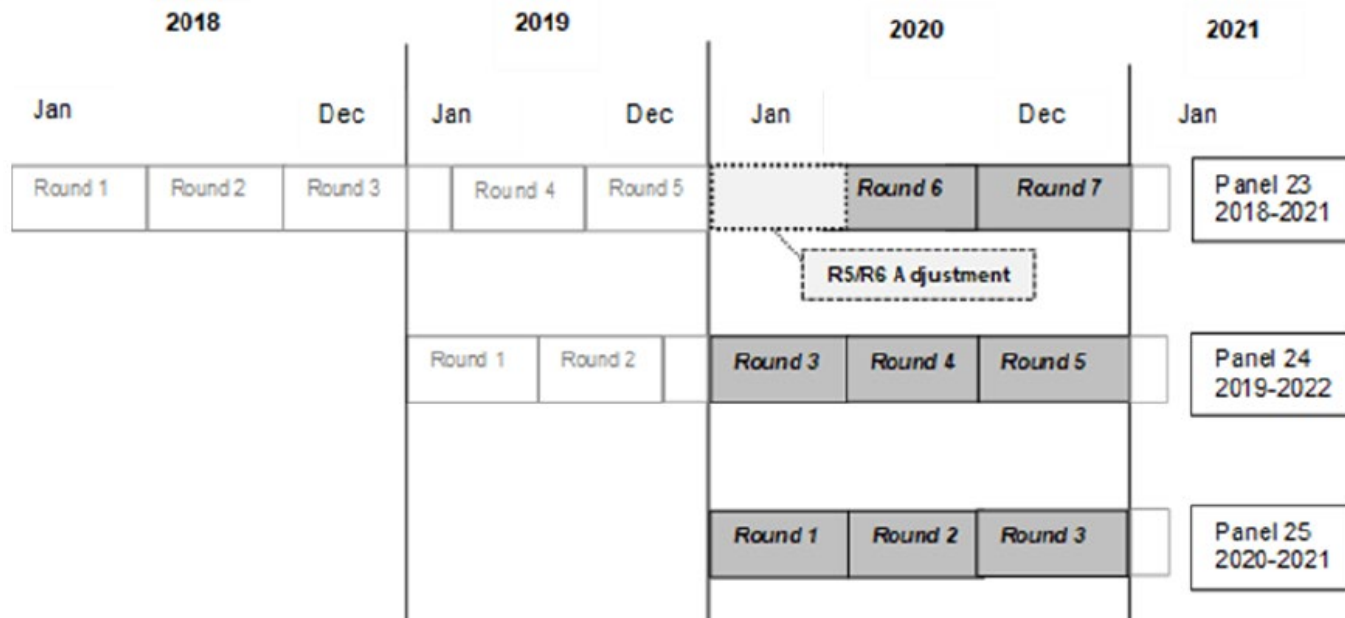

Now these coverage questions are asked at the person level (e.g., “Was Person 1 covered by . . .?”).

Major Changes in 2020 due to COVID-19 Pandemic

- The decision to extend Panel 23 occurred after Panel 23 Round 5 was fielded.
- Therefore, Round 5 was fielded as a traditional terminal round where questions are asked as of 12/31/2019.

Major Changes in 2020 due to COVID-19 Pandemic

Adjustment made to R5 variables for Panel 23

- “At interview date” variables: created using the information obtained during R6 interview.
- FSA variables : collected in first round of the panel in each year, so the value is set to -1.
